

Enviro-Access Website offers several advantages for the environmental companies that want their profile to be more visible:

- It is very well indexed so your page will come in the top results in any research on the Internet.
- It is very attended (more than 3 million visitors in 2005-2006), which is a great advantage for the indexed companies.
- The categories of the repertory of the companies are very detailed, which makes it easy to find the company required.
- It is clearer, more concise and more precise than the other Quebec environmental directories on Internet.
- It includes more than 160 environmental companies.

Directory of Environmental Technology Companies

3 ways of posting your company's profile...

The directory of companies contains three sections:

- Technological companies: Sector

- Technological companies: Field

- Consultant Firms and environmental services

- 1- In the first section are posted the companies which offer **Environmental Technologies** or **Environmental Products** (sales of goods) - classified by **Sector**.
- 2- In the second, one appreciably finds the same companies, but this time, classified according to **Environmental fields**.
- 3- The third section relates to the companies which work in the field of **Environmental Consultation** : impact studies, environmental management systems, laboratory analyses and environmental characterization.

In each category there are several sub-sections which make it possible to the visitor to quickly find the company required.

Moreover, the visitor has the choice to make a research in the alphabetical index, when he knows the name of the company.

All the companies which are found there are described by a brief **descriptive paragraph** (English and French) which includes their activities and their products as well as a telephone number and the email address of your head office in Quebec.

1st CHOICE

Descriptive paragraph (it is free !!!)

The on line setting and the posting of the descriptive paragraph on our Website, and this, for an unlimited period are Enviro-Access gift.

We can work on it by starting from the texts that you will provide us or you can decide to write them yourself.

NOTE: If you decide to write yourself this **descriptive paragraph**, you should respect the following steps:

A) Descriptive paragraph:

- Police force: 12 points, maximum 70 words for the paragraph;
- Name of the company;
- Description of your product (s), service (s) or technology (ies) related to the environment. Description of the applicability of those;
- Telephone numbers **in Quebec** and email address.

B) Indexing on the directory:

Then, you should choose the categories in which you want to include your company. The categories are those reproduced on our Website. Please describe only the activities related to the environment in the **descriptive paragraph**. If your company offers certain services which are not related to the environment, you can include at the end of your **descriptive paragraph** the following sentence: "Other services related to other fields than the environment".

C) Validation by one of our environmental specialists:

Before to have it put on line, the text of your **descriptive paragraph** will be read again and validated (English and French) by one of our specialists as well as your choices in the categories. We will then put it on line after your approval.

2nd CHOICE

Descriptive paragraph + a link to your Website

Or, you can choose to post your profile with a descriptive paragraph and add a link to your Website, which will cost you only \$50 of annual fees

3rd CHOICE

Link to your Company Profile or to your Technological Fact Sheet

Now, here how a company can go further in the description of its activities by obtaining a link to its **Company Profile**.

Company Profile give details (English and French) on your company, commercial activities, market, achievements and coordinates, including a link to its Website. A logo and some photographs (5 maximum) can be inserted.

The costs for the development of a **Company profile** include : page make-up, intern validation with one of our technical advisors, integration of the keywords from your new webpage etc. for an amount of **\$350** (English and French). Thereafter, minimal fees of **\$50** per year will be charged for each **Company Page** housed on our Website.

You can obtain more information and discuss with me by calling at : (819) 823-2230, extension 24 or by sending an email at: mpoisson@enviroaccess.ca

It will be my pleasure to help you work on your company profile to be posted on our Directory of Environmental Technology Companies.
